Contexto general

Universidad Industrial de Santander

Objetivos

General

Elaborar el diseño conceptual e ingeniería de detalle de detectores de neutrones cósmicos para zonas de cultivo y paramos en Colombia.

Objetivos específicos

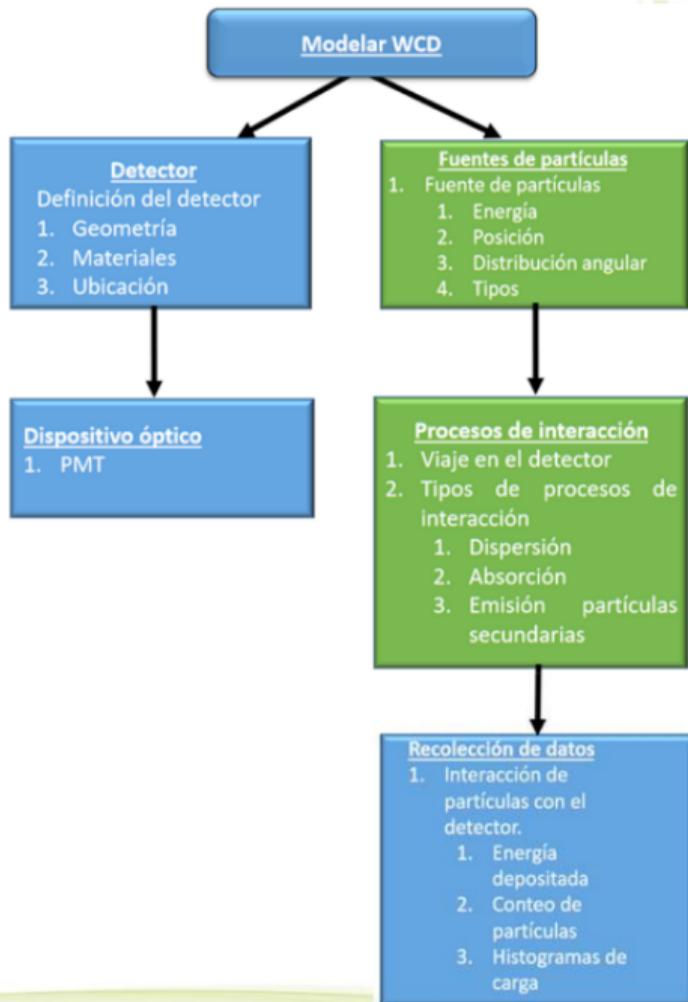

1. Modelar tecnologías de detectores de neutrones cósmicos para monitorear la humedad del suelo en Geant4
2. Evaluar el rendimiento de los modelos tecnológicos de detectores de neutrones cósmicos para monitorear la humedad del suelo en Geant4 en zonas de cultivo y paramos en Colombia.
3. Evaluar el rendimiento de un detector Cherenkov de agua para medir neutrones cósmicos.

A3

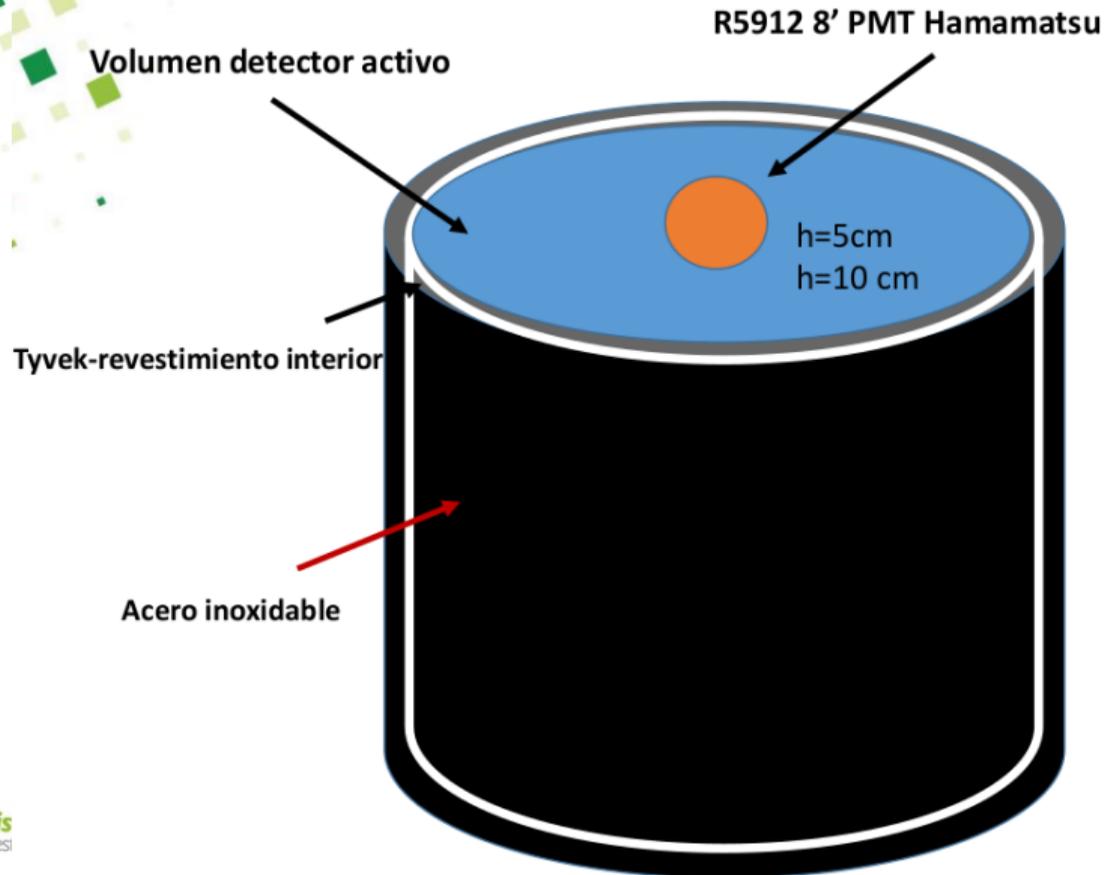

Metodología

Objetivo 1

Modelar tecnologías de detectores de neutrones cósmicos para monitorear la humedad del suelo en Geant4

Simulación del WCD

Materiales:

Polietileno:

$$\rho = \frac{0.935g}{cm^3}$$

Acero inoxidable:

$$\rho = 8 \frac{kg}{m^3}$$

Dimensiones:

$$V = 2.4m^3$$

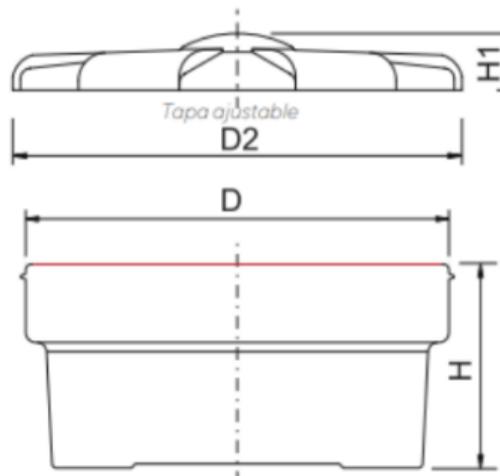

$$A = 1.91m^2$$

$$h = 1.25m$$

$$Esp = 3.2 mm$$

$$EsA = 1.5 mm$$

Tyvek->0.12 mm

Montaje WCD-USQ

Universidad
Industrial de
Santander

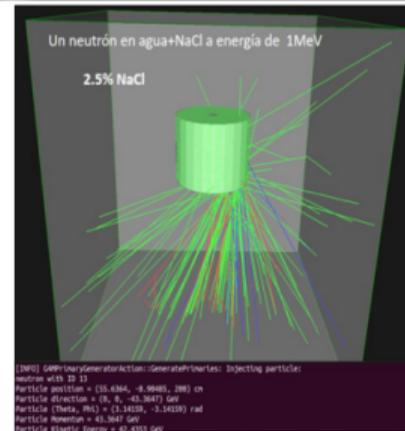

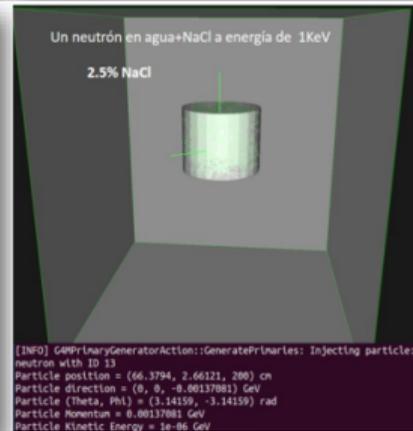

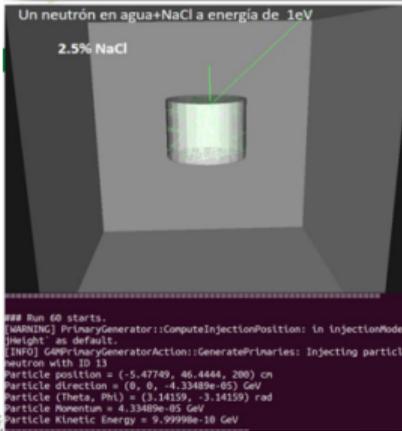

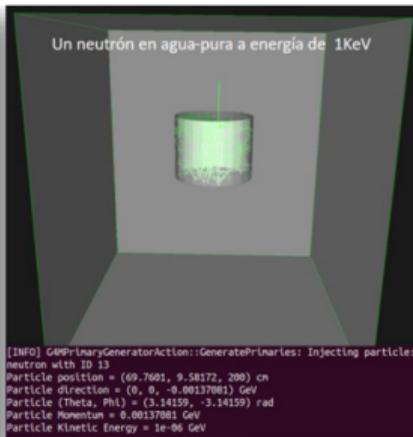

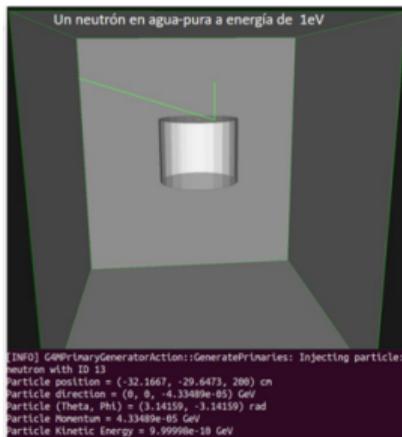

Densidad	0.935 g/cm ³
Módulo de flexión	593 (86.000) MPa (psi)
Esfuerzo de tensión máximo	17.2 (2.500) MPa (psi)
Temperatura de deformación:	a 0.47MPa (68psi) 54°
	a 1.82MPa (264psi) 40°

Simulación (Modelo WCD)

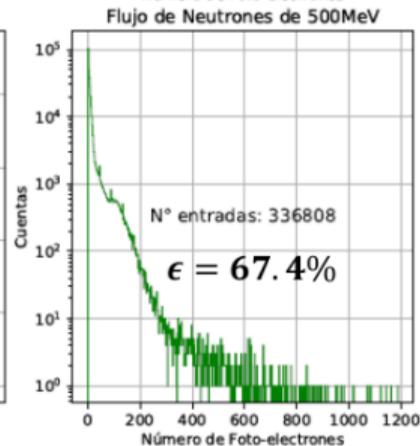

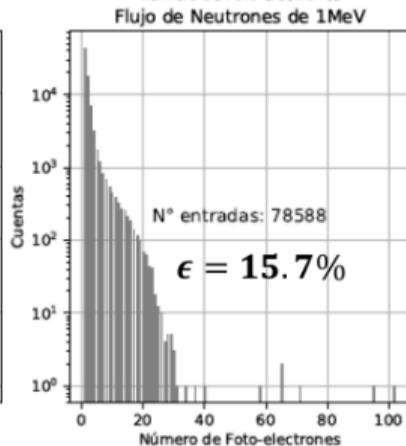

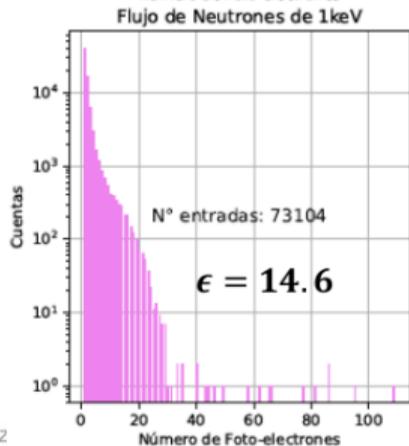

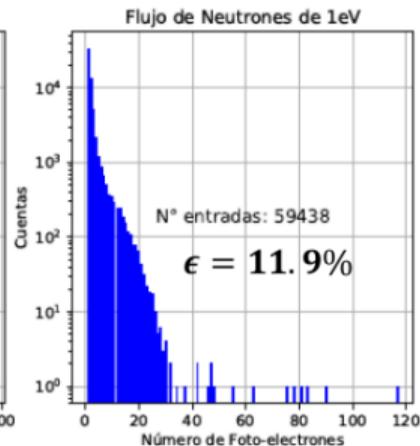

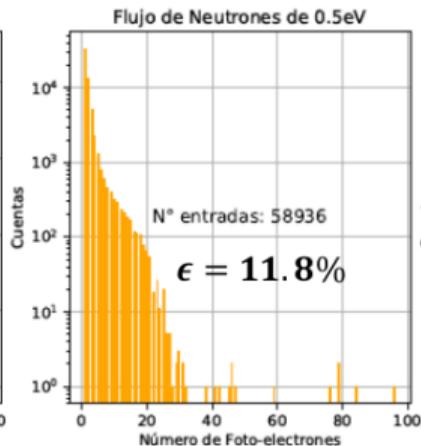

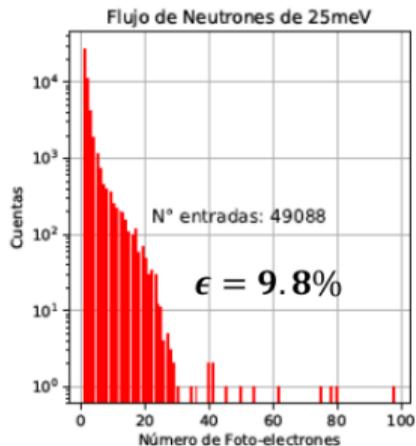

Universidad
Industrial de
Santander

Simulación: Flujo neutrones 20 min – Agua Pura

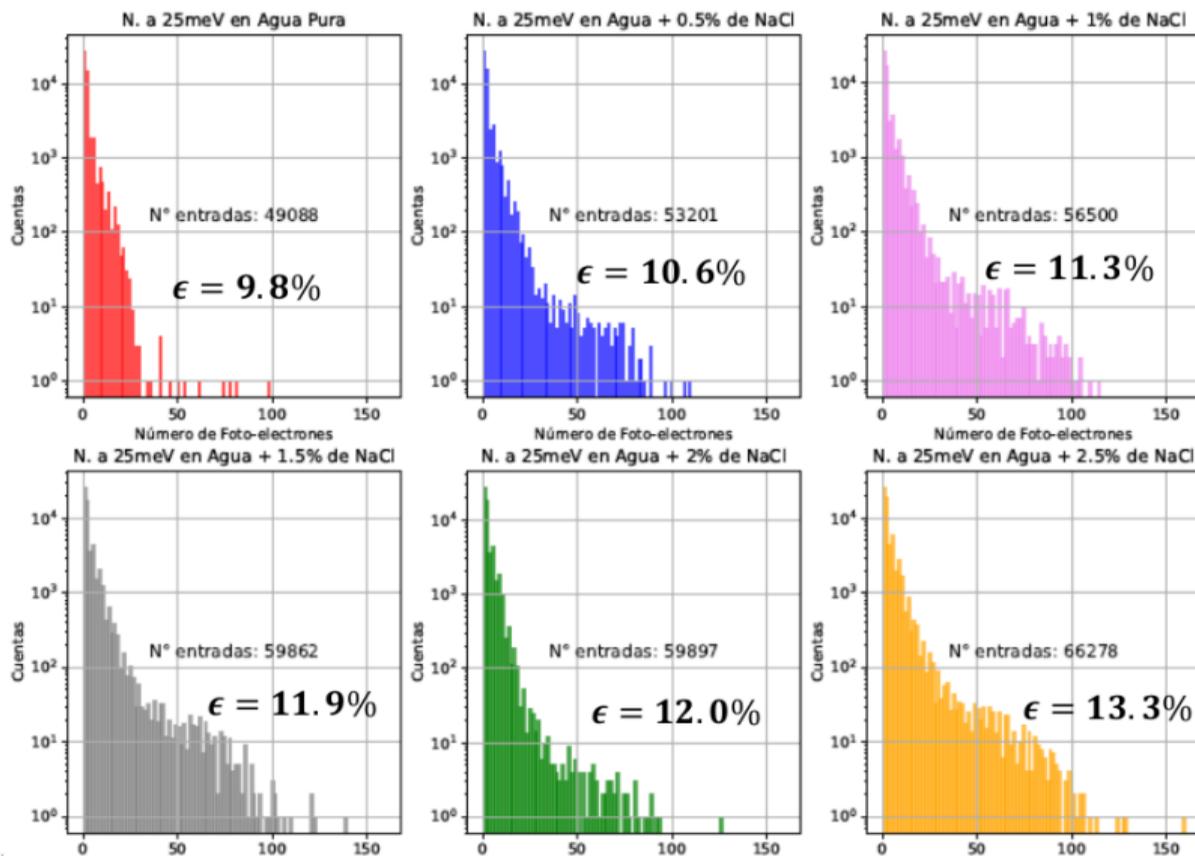

Universidad
Industrial de
Santander

Simulación: Flujo neutrones 20 min (500000) a 25meV

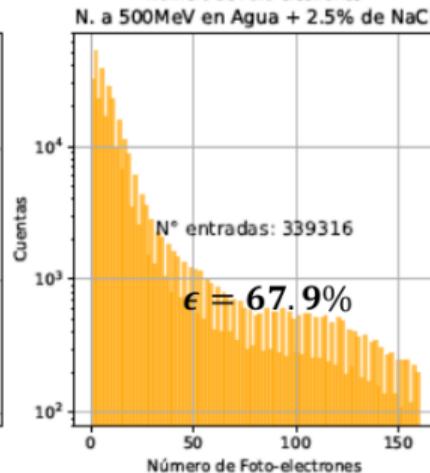

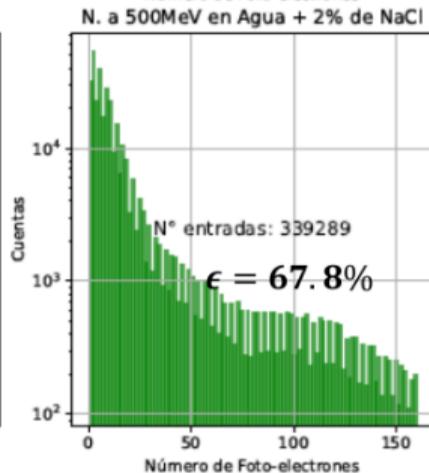

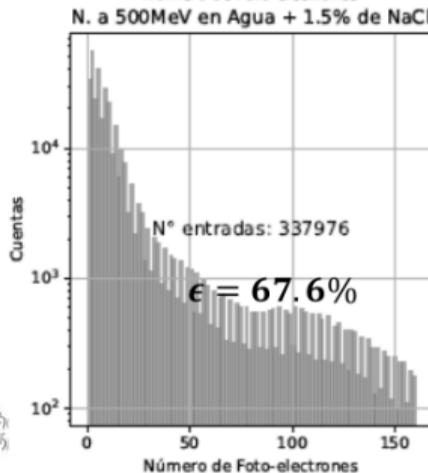

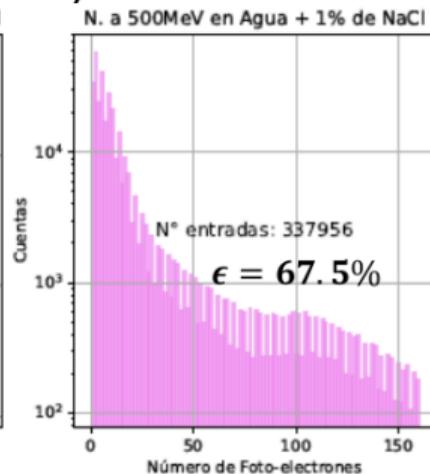

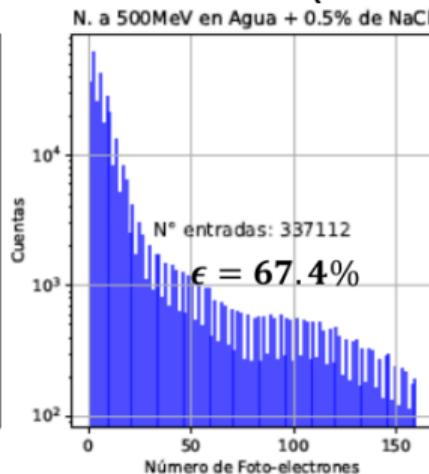

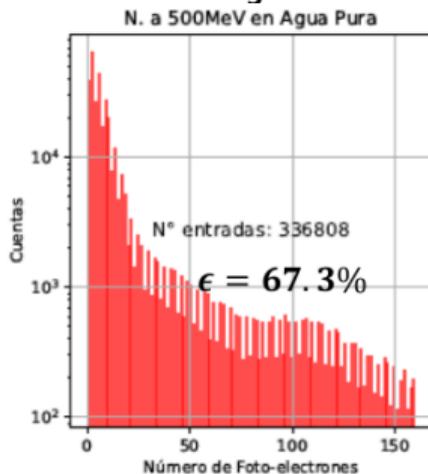

Universidad
Industrial de
Santander

Simulación: Flujo neutrones 20 min (500000) a 500 MeV

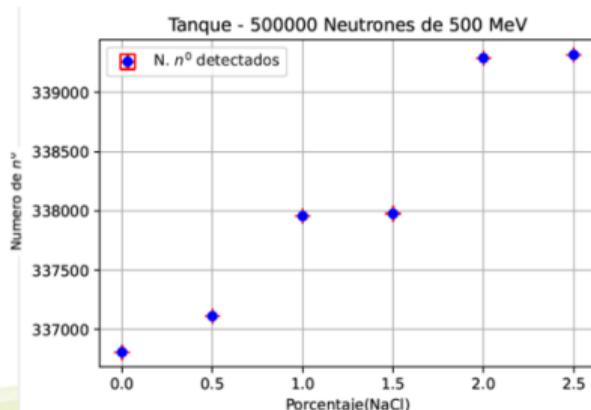

Universidad
Industrial de
Santander

Número de neutrones detectados

Vol-Ene(N)	25meV	0.5 eV	1eV	1KeVC	1MeV	500 MeV
A-P	9.8	11.8	11.9	14.6	15.7	67.4
A+0.5%NaCl	10.6	12.6	12.9	14.1	16.9	67.4
A+1%NaCl	11.3	13.5	13.7	15.1	17.7	67.6
A+1.5%NaCl	12.0	14.3	14.5	15.8	18.7	67.6
A+2.0%NaCl	12.0	15.0	15.3	16.5	19.3	67.9
A+2.5%NaCl	13.3	15.7	15.7	17.2	20.0	67.9

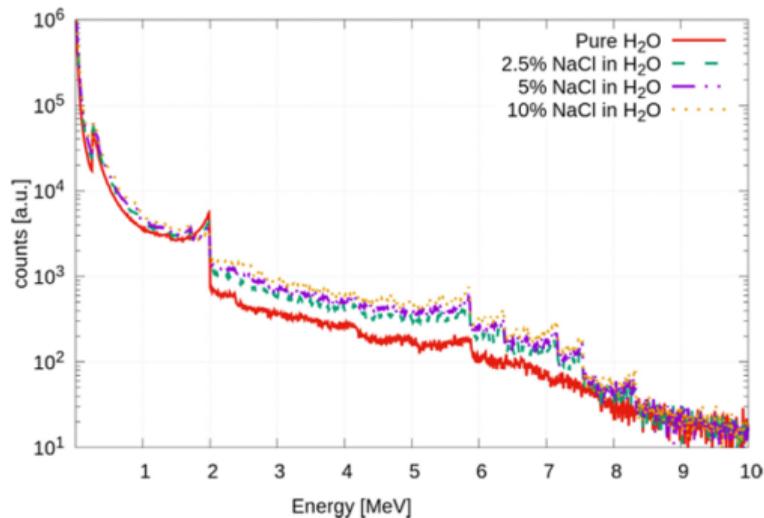

Cuadro: Volumen detector agua + NaCl

Lo que se plantea realizar

Universidad
Industrial de
Santander

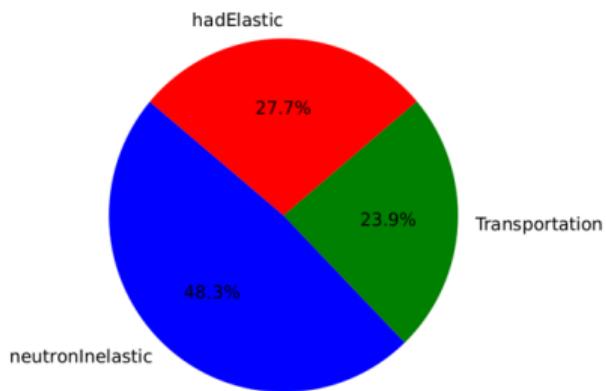

1. Revisión de conceptos y código:
 - ▶ Rastreo paso a paso de partículas (medio detector)
 - ▶ Tipos de partículas.
 - ▶ Procesos de partículas.
 - ▶ Señal de las partículas.
 - ▶ Coordenadas.
2. Contrastar con otros estudios.

Procesos de neutrones

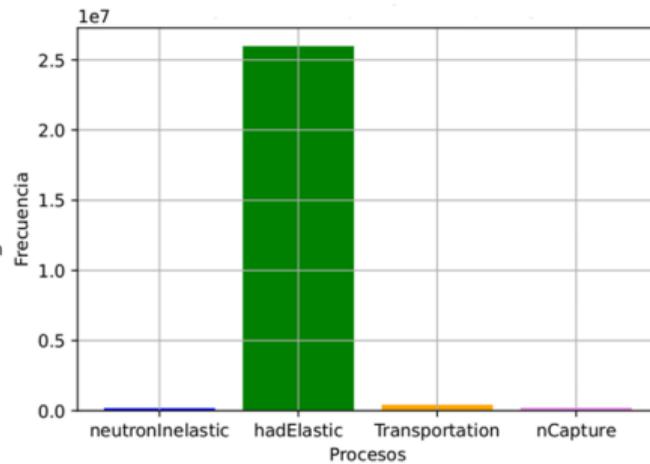

Universidad
Industrial de
Santander

Procesos fuera del detector

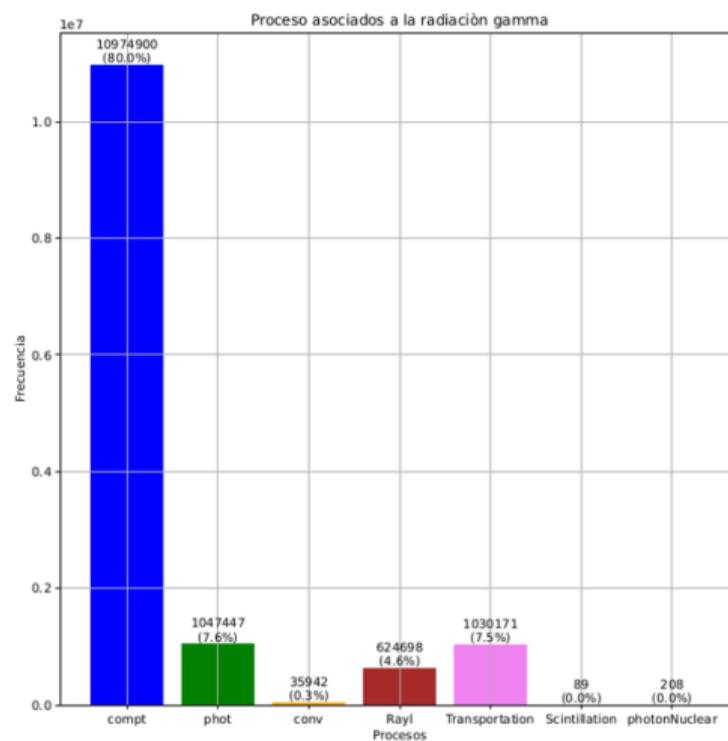

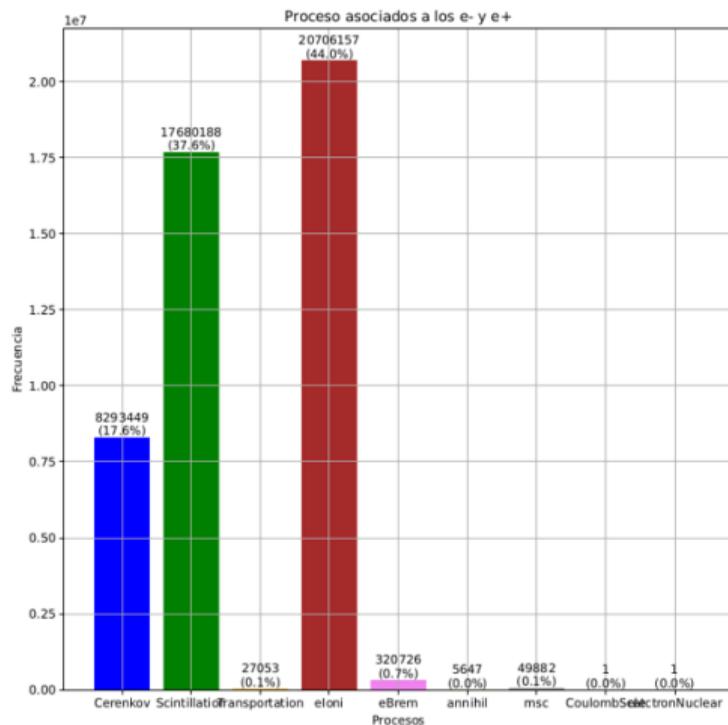

Procesos en el volumen detector (agua)

Procesos de e- y gamma
